

ToolBook[®] 9.5

POWER. SIMPLICITY. NO COMPROMISES.

ToolBook empowers subject matter experts and learning professionals to rapidly create interactive content, quizzes, assessments, and software simulations. With the convenience of on-demand access, your employees will learn more in shorter timeframes—and deliver better business results.

CREATE ENGAGING LEARNING EXPERIENCES WITH EASE

Using content templates for common course types—including compliance, health care, new hire, soft skills, and sales training—ToolBook helps you quickly create professional learning courses. And ToolBook's SmartPages feature helps you easily format page types to enable text with graphics, text with Adobe Flash[®], bulleted text, quizzes, summary scores, and more. Simply select a course template and enter your specific content. It's that easy.

QUICKLY CREATE ASSESSMENTS

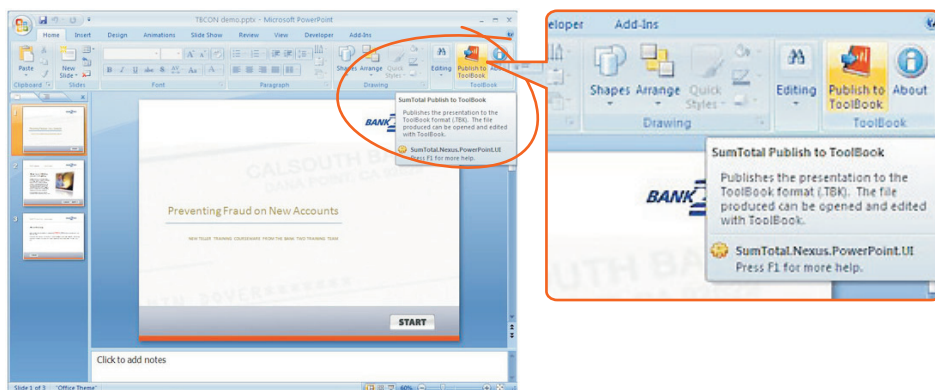

Test and validate user understanding with ToolBook's numerous assessment types, including true/false, multiple choice, drag-and-drop, match item, essay, and more. These

objects have built-in functionality that provides feedback to your users while supplying you with user activity information. In addition, ToolBook's ability to randomise questions and answers helps enable greater testing security.

TURN MICROSOFT POWERPOINT LIBRARY INTO SCORM-COMPLIANT COURSES

ToolBook enables you to convert Microsoft PowerPoint® content into ToolBook format, so you can rapidly reuse existing presentations in your ToolBook-authored courses. And because the supported PowerPoint objects—including text, images, and hyperlinks—become fully editable within ToolBook, you can also enhance an imported presentation with assessments, interactivity, media, and rich effects.

PRODUCE INTERACTIVE LEARNING

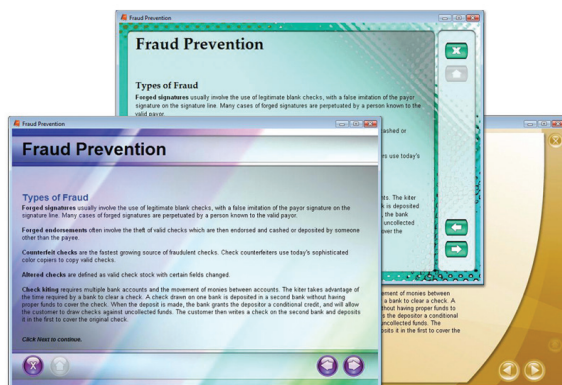

ToolBook lets you create interactive learning experiences, without the need for complex programming. Play media. Navigate the user to another page or Web site. Display scores or animate objects. You can even launch a custom interactivity. And interactions can adapt based on scoring results, user feedback and other information, so learning remains productive and dynamic.

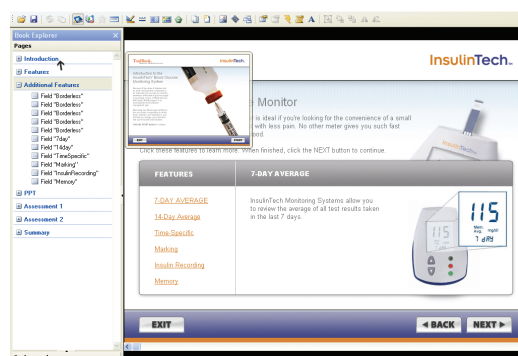

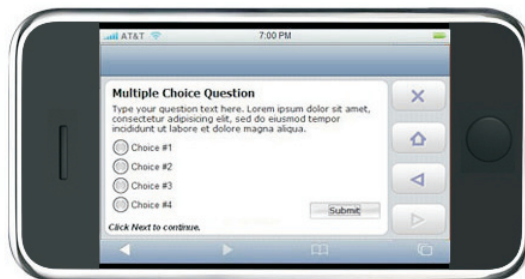

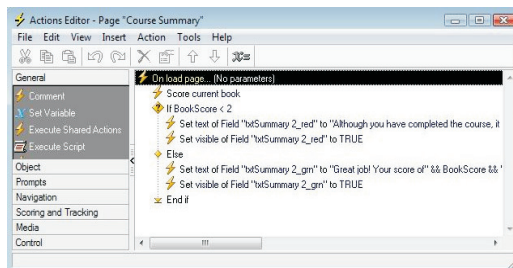

REUSE CONTENT FROM OTHER SOURCES

Sometimes the fastest way to create the final course involves reusing information you already have available. With ToolBook's XML support, you can quickly convert existing content to the ToolBook format to make it fully editable within ToolBook applications.

APPLY A CONSISTENT LOOK AND FEEL WITH A SINGLE CLICK

SmartStyles help you change the look and feel of your entire course with just one click. Using changeable themes, SmartStyles enable you to swiftly change not only your background colour, but also the colours of diagrams, tables, charts, fonts, and even the style of any bullet points within a presentation. By applying a theme, you can be confident that your entire presentation has a professional and consistent interface.

VOICE NARRATION

With ToolBook's voice narration feature, you can add a voice track in mere seconds. The addition of sound opens a new sensory channel for users, so your learners are more apt to absorb and retain data.

CERTIFICATE CREATION

Acknowledging your learners success helps increase satisfaction and encourages greater adoption and usage of learning systems. ToolBook 9.5 now offers more than a dozen professional certificate templates, as well as custom certificate capabilities, so you can easily reward learners as they complete courses.

NO COMPROMISES

ToolBook's Action Editor lets you gain access to various data sources, so you can create custom interactions that respond to real-time scoring information, conduct user prompting, access JavaScript, query databases, and more. Ultimately, these actions help ensure users have the content they need to become increasingly proficient and achieve greater results.

USER ACCESS ON DESKTOP, WEB, AND MOBILE

ToolBook allows you to deliver engaging learning experiences across major operating systems, Web browsers, and mobile devices—so your learners have greater control over when and where to take learning courses. ToolBook content is HTML-based and compatible with Microsoft, Safari, Firefox, Apple iPhone, and Apple iPod touch browsers. ToolBook creates Section 508-compliant content.

CONTENT ORGANISATION BUILT-IN

ToolBook puts you in the driver's seat when working with your content. The Content Explorer gives you get fast and easy access to all pages, page items and backgrounds. And in the Explorer view, you can quickly edit, move, delete, copy and perform numerous authoring activities—all with just a few mouse clicks.

AUTHORING FLEXIBILITY

ToolBook also enables you to create custom authoring catalogs that ensure accurate, project-specific content generation. And ToolBook's built-in scripting feature allows you to create authoring extensions to automate repetitive tasks, or to develop authoring extensions for use by your team.

EASY INTEGRATION WITH LEARNING MANAGEMENT SYSTEMS

ToolBook supports both SCORM and AICC, making it easy for you to include the lessons you create as part of a total e-learning solution. Deliver content using SumTotal Enterprise Suite or any standards-based Learning Management System (LMS). You can also deploy content developed in ToolBook on the Internet, an intranet, a local area network (LAN) or CD-ROM.

Delivery

- HTML
- CD-ROM
- EXE
- Apple iPhone
- Apple iPod touch

Content Creation

- Interactive content
- Assessments
- Compliance training content
- Soft skills training
- Sales training
- Factory-floor training
- Mechanical training
- Media-rich content
- Software application simulations
- Conditional branching
- Hyperlinks
- Question pools

- Randomised question items
- Weighting for answers
- Custom feedback (text, media, remediation)
- Adaptive content
- Free-form authoring
- Custom templates

Extensibility

- Action Editor for easy programming
- Customisable authoring environment
- XML importing
- Access service processes (ASP, CGI, PHP)
- JavaScript and Active X support
- Database access
- Built-in scripting
- Third-party add-ons

Testing and Assessments

- Multiple choice (single answer)
- Multiple choice (multiple correct)
- True/false
- Hot spots (invisible touch area)
- Fill-in-the-blank
- Fill-in-the-blank with phonetic matching
- Free-form essay
- Match item (text and visuals)
- Sequence (sequence the order of steps in a procedure)
- Sliders and scales
- Randomise questions
- Randomise answers
- Specify weighting of answers
- Specify number of user attempts
- Timed assessments
- Multiple security levels for assessments
- Delayed feedback
- Text feedback

ToolBook[®] INSTRUCTOR[™] 9.5

- Media feedback
- Scripting for custom feedback and question types
- Customisable remediation using scripting

Standards and Tracking

- SCORM 2004
- SCORM 1.2
- AICC
- SumTotal platform
- Third-party LMS support through standards
- Ability to send learner results to back-end servers or by email

Rapid Content Development

- Book Explorer
- Software application simulation recorder and editor
- Content wizards
- Web publishing wizard
- Certificate feature
- Templates
- SmartPages and SmartStyles
- Catalog of pre-programmed objects
- WYSIWYG authoring
- Online help

- Tutorials and learning guides
- Spell check
- Third-party add-ons

Customisation Capabilities

- Create-your-own templates
- Customisable catalog and contents
- Customisable authoring interface
- Access to third-party extensions

Media

- Images: bmp, cdr, ch3, dib, drw, dxf, eps, gif, jpg, pcd, pct, pcx, pic, png, tga, tif, wmf
- Audio: aa, aif, aifc, aiff, mid, midi, mp3, mp3 playlist, rmi, wav, streaming audio by Microsoft[®], RealAudio[™] or Apple QuickTime[™]
- Video: avi, mov, mpg, streaming video by Microsoft[®], RealVideo[™] or Apple QuickTime[™]
- Other: Macromedia Flash[®], Windows[®] media files, RealMedia[™] media files, asp, http

Accessibility Support

- Section 508 Support
- Support for Freedom Scientific Jaws
- Accessible tags
- Definable tabbing order
